Calmurid® 10%/5% w/w Cream
(Urea 10% w/w, Lactic Acid 5% w/w)

PATIENT INFORMATION LEAFLET

Your medicine will be referred to as Calmurid throughout the following leaflet.

Read all of this leaflet carefully before you start using this medicine because it contains important information for you.

Always use this medicine exactly as described in this leaflet or as your doctor or pharmacist have told you.

- Keep this leaflet. You may need to read it again.
- Ask your pharmacist if you need more information or advice.
- If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet. See section 4.
- You must talk to a doctor if you do not feel better or if you feel worse.

What is this medicine?

1. What Calmurid is and what it is used for

- Calmurid is a moisturising cream to treat dry, rough, scaly skin such as eczema and similar conditions.
- The active substances in Calmurid are urea and lactic acid which act as moisturisers. This helps make your skin soft and supple.

2. What you need to know before you use Calmurid

- Do not use Calmurid:
  - If you are allergic to urea or lactic acid or any of the other ingredients of this medicine (listed in section 6).
  - If you have used Calmurid previously and had a reaction.
  - Calmurid may cause stinging if applied to damaged skin (raw cracked areas or cracked skin) or sensitive areas of the body such as the mouth or nostrils.

3. How to use Calmurid

- Apply a thick layer over the affected areas. Do not rub it in yet.
- Leave it on your skin for 3 to 5 minutes, then rub it in gently.
- Avoid contact with the eyes, eyelids, lips and other mucous surfaces.
- Upon accidental contact, rinse the affected area with clean water.
- Calmurid may cause stinging if applied to damaged skin (raw cracked areas or cracked skin) or sensitive areas of the body such as the mouth or nostrils.

4. Possible side effects

- Like all medicines, this medicine can cause side effects, although not everybody gets them.

Effects on the skin

- Calmurid may cause stinging if applied to raw areas or cracks in the skin or the lips.
- Keep Calmurid away from other sensitive areas of your body.

Effects on the mouth

- If stinging occurs, wash the cream off with water.
- Should stinging be a problem, you can mix it with an equal amount of Aqueous Cream BP (ask your pharmacist for this) for a week, after which it would be alright to use the cream on its own again, but you must consult your doctor or pharmacist first.

5. How to store Calmurid

- Keep out of the sight and reach of children.
- Do not use Calmurid after the expiry date which is stated on the tube and carton. The expiry date refers to the last day of that month.
- Do not store above 25°C. Store in a dry place. Do not refrigerate or freeze.
- Store in the original package in order to protect from moisture.

6. Contents of the pack and other information

- Your doctor or pharmacist has recommended this cream for use as a moisturising cream for the treatment of dry, rough, scaly skin such as eczema and similar conditions.
- Calmurid contains the active substances urea 100mg/g and lactic acid 50mg/g.
- The other ingredients are glyceryl monostearate, betaine monohydrate, diethanolamine cetyl phosphate, hard fat, cholesterol, sodium chloride and purified water.

What Calmurid looks like and contents of the pack

Calmurid is a white cream. It is available in 100 g tubes either on prescription from your doctor or indirectly from your pharmacist.

Leaflet issue and revision date: (Ref) 02.01.14[2]

Calmurid is a trademark of Galderma S.A.
Your medicine will be referred to as Urelac throughout the following leaflet.

Read all of this leaflet carefully before you start using this medicine because it contains important information for you.

Always use this medicine exactly as described in this leaflet or as your doctor or pharmacist have told you.

- Keep this leaflet. You may need to read it again.
- Ask your pharmacist if you need more information or advice.
- If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet. See section 4.
- You must talk to a doctor if you do not feel better or if you feel worse.

What is in this leaflet:
1. What Urelac is and what it is used for
2. What you need to know before you use Urelac
3. How to use Urelac
4. Possible side effects
5. How to store Urelac
6. Contents of the pack and other information

1. WHAT URELAC IS AND WHAT IT IS USED FOR
- Your doctor or pharmacist has recommended this cream for use as a moisturising cream for the treatment of dry, rough, scaly skin such as eczema and similar conditions.
- The active substances in Urelac are urea and lactic acid which act as moisturisers. This helps make your skin soft and supple.

2. WHAT YOU NEED TO KNOW BEFORE YOU USE URELAC
Do not use Urelac:
- If you are allergic to urea or lactic acid or any of the other ingredients of this medicine (listed in section 6).

Please seek immediate medical attention if you experience symptoms of an allergic reaction. Signs or symptoms of a severe allergic reaction may include a rash, with or without itching, swelling of the face, eyelids or lips and difficulty in breathing.

Warnings and precautions
Talk to your doctor or pharmacist before using Urelac.
- Avoid contact with the eyes, eyelids, lips and other mucous surfaces.
- Upon accidental contact, rinse the affected area with clean water.
- Urelac may cause stinging if applied to damaged skin (raw cracked areas or cracked skin) or sensitive areas of the body such as the mouth or nostrils.

Other medicines and Urelac
Tell your doctor or pharmacist if you are taking, have recently taken or might take any other medicines.
- This cream might affect other medicines that you apply to your skin. Tell your doctor or pharmacist if you are using other medicines in this way.
- If stinging occurs, wash the cream off with water.
- Keep Urelac away from other sensitive areas of your body.

Pregnancy, breast-feeding and fertility
If you are pregnant or breast-feeding, think you may be pregnant or are planning to have a baby, ask your doctor or pharmacist for advice before taking this medicine.

3. HOW TO USE URELAC
Always use this medicine exactly as described in this leaflet or as your doctor or pharmacist have told you. Check with your doctor or pharmacist if you are not sure.
- Urelac Cream is for EXTERNAL USE ONLY.
- First gently wash and dry the affected areas of your skin.
- Apply a thick layer over the affected areas. Do not rub it in yet.
- Leave it on your skin for 3 to 5 minutes, then rub it in gently.
- Wash off any excess cream with a tissue (do not wash it off).
- The cream should be used in this way twice a day, or as advised by your doctor.
- If you need to use Urelac on your feet, soak them in water for 15 minutes and then dry them with a rough towel before use.
- How long you will have to use this medicine will depend on how quickly your condition improves. Always seek the advice of your doctor or pharmacist.

If you use more Urelac than you should or accidentally swallow any of the cream
If you use too much Urelac and stinging occurs, wash the cream off with water.
In the rare event that you accidentally swallow any of this medicine, seek medical advice.

If you forget to use Urelac
Do not worry if you forget to use your cream at the right time. When you remember, start using the medicine again as you did before.

If you have any further questions on the use of this medicine, ask your pharmacist.

4. POSSIBLE SIDE EFFECTS
Like all medicines, this medicine can cause side effects, although not everybody gets them.

Effects on the skin
- Urelac may cause stinging if applied to raw areas or cracks in the skin or the lips.
- Keep Urelac away from other sensitive areas of your body.
- If stinging occurs, wash the cream off with water.
- Should stinging be a problem, you can mix it with an equal amount of Aqueous Cream BP (ask your pharmacist for this) for a week, after which it would be alright to use the cream on its own again, but you must consult your doctor or pharmacist first.

Reporting of side effects
If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet. You can also report side effects directly via the Yellow Card Scheme at: www.mhra.gov.uk/yellowcard.

By reporting side effects, you can help provide more information on the safety of this medicine.

5. HOW TO STORE URELAC
- Keep out of the sight and reach of children.
- Do not use Urelac after the expiry date which is stated on the tube and carton. The expiry date refers to the last day of that month.
- Do not store above 25°C. Store in a dry place. Do not refrigerate or freeze.
- Store in the original package in order to protect from moisture.

Shelf life after first opening of the container: 30 days

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.
