Signs of sexual organ changes in males

In males, it is possible that there is a feminisation effect. This is characterised • by a deepening of the voice, • development of breasts and • a decrease in sexual drive. It is not known whether these effects will become permanent or • reversible after the use of Co-cyprindiol has stopped.

The rash known as herpes gestations may harm them, even if their symptoms are the same as yours.

Severe liver disease, • headaches, • swelling of body parts

If any of these conditions apply to you, you must discuss them with your doctor before you start taking Co-cyprindiol.

Take special care with Co-Cyprindiol

If you also have (or have ever had) a kidney problem, you should consult your doctor or pharmacist before you start using Co-Cyprindiol.

If you must have an operation, or if you are off your feet for a long time compared with a woman not taking any combined pill. The risk of developing a blood clot is slightly increased. Whether this is an effect of Co-cyprindiol is not known. You may need to stop the Pill before surgery and during the time you are off your feet.

If you are taking a 21 day contraceptive pill, finish that pack and then start a new one.

If you have (or have ever had) a blood clot in your veins or arteries. This applies to the following conditions:

Migraine

If you are relying on this medicine for contraception, it is important that you keep all the tablets in your pack and any tablets from any incomplete pack until you are completely sure you are not pregnant. Start with the first day of the new month. Continue until you have finished the pack. If you forget to start taking the daily Co-cyprindiol tablets continue to take your usual dose on the next day.

If you are relying on this medicine for contraception, you are advised to continue taking the tablets until you are sure you are not pregnant. If you stop taking the Pill, you will stop bleeding immediately. It is not possible to become pregnant if you are not bleeding. If you are not taking the Pill and you start bleeding, you should stop taking the tablets and see your doctor.

If you have (or have ever had) a blood clot in your veins or arteries, you should consult your doctor or pharmacist before you start using Co-Cyprindiol.

The rash known as herpes gestations may harm them, even if their symptoms are the same as yours.

Stop in a day or two. Keep taking the pills as usual, and the problem should not recur.
