Maricain® Polyamp Steripack 0.25% and 0.5% bupivacaine hydrochloride

Maricain® Polyamp Steripack contains a medicine called bupivacaine hydrochloride. It belongs to a group of medicines called local anaesthetics. Maricain® Polyamp Steripack is used to numb (anaesthetise) parts of the body. It is used to stop pain happening or to prevent pain relief.

You can be used to:
- Numb parts of the body during surgery in adults and children above 12 years.
- Relieve pain in adults, infants and children above 1 year of age.

What you need to know before Maricain® Polyamp Steripack is given to you

1. You must not be given Maricain® Polyamp Steripack if:
   - You are allergic to bupivacaine hydrochloride or any of the other ingredients of this medicine (listed in section 6).
   - You are allergic to any other local anaesthetics of the same class (such as lidocaine or ropivacaine).
   - You have a skin infection near to where the injection will be given.
   - You have something called cardiogenic shock (a condition where the heart is unable to supply enough blood to the body).
   - You have something called hypovolaemic shock (very low blood pressure leading to collapse).
   - You have problems with clothing of your body.
   - You have diseases of the brain or spine such as meningitis, polio or syphilis.
   - You have a severe headache caused by bleeding inside the head (intracranial haemorrhage).
   - You have problems with your spinal cord due to anaemia.
   - You have blood poisoning (septicaemia).
   - You have had a recent infection, tuberculosis or tumours of the spine.
   - You must not be given Maricain® Polyamp Steripack if any of the above apply to you. If you are not sure, talk to your doctor or nurse before you are given Maricain® Polyamp Steripack.

2. Warnings and precautions
   - Talk to your doctor or nurse before having Maricain® Polyamp Steripack:
     - If you have heart, kidney or liver problems.
     - If you have had a recent injection of any local anaesthetic.
   - This is because your doctor may need to adjust the dose of Maricain® Polyamp Steripack.
   - If you have a swollen stomach due to more fluid than normal.
   - If you have a stomach tumour.
   - If you have been told that you have decreased volume of blood (hypovolaemia).
   - If you have fluid in your lungs.

3. Children
   - In children aged less than 12 years as some injections of Maricain® Polyamp Steripack in order to numb parts of the body during surgery are not established in younger children. The use of Maricain® Polyamp Steripack is not established in children less than 1 year of age.
   - If you are not sure if any of the above apply to you talk to your doctor or nurse before you are given Maricain® Polyamp Steripack.

Other medicines and Maricain® Polyamp Steripack

Tell your doctor if you are taking, have recently taken or might take any other medicines. This includes medicines that you buy without prescription and herbal medicines. This is because Maricain® Polyamp Steripack can affect the way some medicines work and some medicines can have an effect on Maricain® Polyamp Steripack.

In particular, tell your doctor if you are taking any of the following medicines:
- Medicines used to treat an uneven heart beat (arrhythmias) such as lidocaine, mexiletine or amiodarone.
- Medicines used to stop blood clots (anti-coagulants).

Your doctor needs to know about these medicines because it maybe to work out the correct dose of Maricain® Polyamp Steripack for you.

Pregnancy, breast-feeding and fertility
If you are pregnant or breast-feeding, think that you may be pregnant or are planning to have a baby, ask your doctor or advice before taking this medicine.

Driving and using machines
Maricain® Polyamp Steripack may make you feel sleepy and affect the speed of your reactions. After you have been given Maricain® Polyamp Steripack, you should not drive or use tools or machines until the next day.

Maricain® Polyamp Steripack contains sodium
Maricain® Polyamp Steripack contains up to 310 milligrams (mg) of sodium in each milliliter (ml) equivalent to 3.4 mg per 10 ml ampoule. Your doctor will take this into account if you are on a sodium controlled diet.

5. How Maricain® Polyamp Steripack is given to you

Maricain® Polyamp Steripack will be given to you by a doctor. Your doctor will know the correct way to give you this medicine.

The dose that your doctor gives you will depend on the type of pain relief that you need and the part of your body that the medicine will be injected into. It will also depend on your body size, age, and physical condition. Usually one dose will last long enough but more doses may be given if the surgery takes a long time.

Maricain® Polyamp Steripack will be given to you as an injection. The part of the body where you are injected will depend on why you are being given Maricain® Polyamp Steripack. Your doctor will give you Maricain® Polyamp Steripack in one of the following places:
- Near to the part of the body that needs to be numbed.
- In an area away from the part of the body that needs to be numbed. This is the case if you are given an epidural injection (an injection around the spinal cord).

When Maricain® Polyamp Steripack is injected into the body in one of these ways, it stops the nerves from being able to pass pain messages to the brain. It will slowly wear off when the medical procedure is over.

If you have been given too much Maricain® Polyamp Steripack

Serious side effects from getting too much Maricain® Polyamp Steripack are unlikely. They need special treatment and the doctor treating you is trained to deal with these situations. The first signs of being given too much Maricain® Polyamp Steripack are usually as follows:
- Feeling dizzy or light-headed
- Nummberness of the lips and around the mouth
- Nummberness of the tongue.
- Hearing problems.
- Problems with your sight (vision).

To reduce the risk of serious side effects, your doctor will stop giving you Maricain® Polyamp Steripack as soon as these signs appear. This means that if any of these happen to you, or you think you have received too much Maricain® Polyamp Steripack, tell your doctor immediately.

More serious side effects from being given too much Maricain® Polyamp Steripack include twitching of your muscles, fits (seizures), and loss of consciousness.

If you have any further questions on the use of this medicine, ask your doctor, pharmacist or nurse.

4. Possible side effects

Like all medicines, this medicine can cause side effects, although not everybody gets them.

Severe allergic reactions (rare, may affect up to 1 in 1,000 people)
If you have a severe allergic reaction, tell your doctor immediately. The signs may include sudden onset of:
- Swelling of your face, lips, tongue or throat. This may make it difficult to swallow.
- Severe or sudden swelling of your hands, feet and ankles.
- Difficulty breathing.
- Severe itching of the skin (with raised lumps).

If you are using this medicine, please answer the following questions:

1. Have you any questions about the use of this medicine?
2. Do you understand how you should use this medicine?
3. Are you able to take this medicine without any difficulty?
4. Is there anything else you would like to know about this medicine?

If you continue to have any problems with your condition, please speak to your doctor or nurse.

This leaflet gives you general information about this medicine. It does not take into account all possible side effects. It is not a substitute for the information provided by your doctor, pharmacist or nurse.
What possible side effects may occur?

Very common (may affect more than 1 in 10 people):

- Low blood pressure. This might make you feel dizzy or light-headed.
- Feeling sick (nausea).

Common (may affect up to 1 in 10 people):

- Being sick (vomiting).
- Feeling dizzy.
- Pins and needles.
- High blood pressure (hypertension).
- Slow heart beat.
- Problems passing water.

Uncommon (may affect up to 1 in 100 people):

- Feeling light-headed.
- Fits (seizures).
- Numbness of the tongue or around the mouth.
- Ringing in the ears or feeling sensitive to sound.
- Difficulty speaking.
- Blurred sight (vision).
- Loss of consciousness.
- Shaking (tremors).
- Twitching of your muscles.

Rare (may affect up to 1 in 1,000 people):

- Double vision.
- Nerve damage that may cause changes in sensation or muscle weakness (neuropathy).
- This may include peripheral nerve damage.
- A condition called arachnoiditis (inflammation of the membrane that surrounds the spinal cord). The signs include a stinging or burning pain in the lower back or legs and tingling, numbness or weakness in the legs.
- Weak or paralysed legs.
- Uneven heart beat (arrhythmia). This could be life-threatening.
- Slowed or stopped breathing or stopped heart beat. This could be life-threatening.

Possible side effects seen with other local anaesthetics which might also be caused by Marcain Polyamp Steripack include:

- Problems with your liver enzymes. This may happen if you have long-term treatment with this medicine.
- Damaged nerves. Rarely this may cause permanent problems.
- Blindness which is not permanent or problems with the muscles of the eyes that are long-lasting. This may happen with some injections given around the eyes.

Do not be concerned by this list of possible side effects. You may not get any of them.

Reporting of side effects

If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet. You can also report side effects directly via the Yellow Card Scheme at: www.mhra.gov.uk/yellcard

By reporting side effects you can help provide more information on the safety of this medicine.

How to store Marcain Polyamp Steripack

Keep the medicine out of the sight and reach of children.

Do not use this medicine after the expiry date which is stated on the container after EXP. The expiry date refers to the last day of that month.

Store below 30°C. Do not freeze.

Your doctor or the hospital will normally store Marcain Polyamp Steripack and they are responsible for the quality of the product when it has been opened if it is not used immediately. They are also responsible for disposing of any unused Marcain Polyamp Steripack correctly.
