Read all of this leaflet carefully before you start using this medicine.

1. What this medicine is and what it is used for

Betamethasone valerate/Clioquinol Ointment contains two different medicines called betamethasone valerate and clioquinol.

Betamethasone valerate belongs to a group of medicines called steroids. It helps to reduce swelling and irritation. Clioquinol is an anti-bacterial medicine, it fights bacterial and fungal infections of the skin.

This medicine is used to help reduce the redness and thickness of certain skin problems. These skin problems include eczema, psoriasis, dermatis or insect bites, where an infection may be a problem.

2. How to use Betamethasone/Clioquinol Ointment

Read this leaflet carefully before using your medicine. If you have any further questions, ask your doctor or pharmacist.

3. How to store Betamethasone/Clioquinol Ointment

4. Possible side effects

5. How to report side effects

6. Further information

Staining of your hair, skin and clothes can occur. You can protect clothes by covering the treated area with a cotton bandage or piece of plastic wrap. If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any side effects not listed in this leaflet. By reporting side effects you can help provide more information on the safety of this medicine.
